utrinque purpurea.

## TODUS CÆRULEUS?

*Latb. ind. orn.* p. 266.

*Gmel. Syst. Nat.* 1. p. 444.

---

Alcedinis pusillæ sui generis longe minimæ,  
ostendit tabula veram et naturalem magnitudinem.  
Generat eam India Orientalis. In Sumatra etiam  
frequens conspicitur.

Published for the Royal Society of Arts by W. & D. Brewster, 1859.

THE  
MINUTE KINGFISHER.

*GENERIC CHARACTER.*

*Bill trigonal, thick, strait, long, sharp-pointed.*

*Tongue fleshy, very short, flat, sharp-pointed.*

*Feet* (in most species) gressorial, *i. e.* three toes forward and one backward ; and the three lower joints of the middle toe closely joined to those of the outmost.

*Linnæus and Pennant.*

*SPECIFIC CHARACTER, &c.*

SMALL BLUE KINGFISHER? (Tody?) fulvous beneath, with a purple spot on each side the neck.

LE TODIER BLEU à ventre orangé.

*Buff. ois.* 7. p. 229.

TODIER DE JUIDA?

*Pl. enl.* 783. f. 1.

---

This bird is beyond comparison the smallest of the Kingfisher tribe. The plate represents it in its natural size. It is a native of the East Indies, and is also common in Sumatra.
